Read Me – Task 5: My favourite study spots in London

Description:

This project showcases a list of favorite study spots in London, along with their ratings, pros, and cons. The data is fetched from a Google Sheet using JavaScript and displayed dynamically on the webpage. Users can interact with the study spots, view additional information such as pros and cons, and sort the spots based on their ratings.

Usage:

To use the application:
- Open the webpage in a web browser.
- Explore the list of study spots displayed on the page.
- Click on the "Pro" button to view the pros of each study spot.
- Click on the "Con" button to view the cons of each study spot.
- Click on the "High" button to sort the study spots in descending order based on their ratings.
- Click on the "Low" button to sort the study spots in ascending order based on their ratings.

Build with:

Fetching Google sheet data using opensheet

Future Implementations:

For future improvements, a search bar could be added, or even the option for the user to submit their own favourite places to study.
